ABOUT

ANDREW HOANG

Organic growth, engineered. Measured end to end.

SEO & Organic Growth Manager with **9+ years** building organic and app growth for B2C, D2C and enterprise brands across **Education, Health, Insurance, E-commerce, Wedding, Finance and B2B SaaS**.

Currently owning SEO, AEO and ASO at **ELSA Speak** across **Japan, Vietnam, Thailand, Taiwan and the US**, with month-over-month app installs as the core business KPI. In parallel, running a **13-account paid media portfolio** for Australian agency **UpperCut** and organic + lifecycle growth for **LUMEtest (Lume)**.

Core focus spans **AI search (AEO / GEO), technical SEO, App Store Optimization, attribution engineering and value-based paid media** — with Python, SQL and BigQuery used to build the measurement layer rather than just read it.

9+
Years in digital & organic growth

CAPABILITIES

CORE EXPERTISE

AI Search & Optimization

- AEO / GEO · RAG pipelines · vector embeddings & semantic search
- Query fan-out coverage · topic clustering · LLM content optimization
- AI citation & share-of-voice tracking · schema & structured data

SEO & ASO

- Technical SEO · Core Web Vitals · site migrations
- App Store Optimization — Apple App Store & Google Play
- Keyword & SERP strategy · international / multi-market SEO

Analytics & Attribution

- GA4 · Google Search Console · GTM · AppsFlyer (web-to-app)
- BigQuery · Looker Studio · Ahrefs · SEMrush · Screaming Frog
- Attribution QA, methodology audits and anomaly alerting

Paid Media & Automation

- Google Ads (MCC / multi-account) · Meta (Advantage+, DPA, CBO / ABO)
- TikTok · Zalo · value-based bidding · budget pacing & forecasting
- Python · SQL · HTML/CSS/JS · WordPress · Shopify · Apps Script · Zapier · n8n · HubSpot

WHAT I FIX UNDER THE HOOD

CRAWL · INDEX · RENDER · MEASURE

The layer every other channel stands on

Crawl & indexation

- XML sitemaps, canonicals and duplicate URLs
- Error pages that do not return 404; internal links to 4XX / 5XX
- JavaScript rendering and network-request crawl blocks

70,075

Indexed pages audited across 8 ELSA sites · ~80% of the issues fixed

Performance & Core Web Vitals

- Database clean-ups and custom-function refinements
- Plugin and permalink fixes on WordPress and Shopify
- Regular performance audits and security reviews

5% → 90%

Mindful Organization pages passing Core Web Vitals

Migrations & platforms

- Site migrations inside developer release processes
- Adobe Experience Manager (AEM), Strapi and Colorful CMS; WordPress; Shopify
- HTTP → HTTPS with 301 / 308 redirects (Loribeds)

129K clicks

Dep365, first 4 months after migration · site performance 1.5x

Technical clean-up at speed

- Issues logged, prioritised and fixed with developers
- Redundant pages, structural errors, duplicate content
- Documentation kept current so fixes survive handovers

479

Critical technical issues resolved in 2 months · hieuvetiemchung (DrCom)

Structured data & AI retrieval

- Schema and structured data
- Query fan-out and chunk-level structure on 1,211 pages
- Vector DB of ~20K URLs for duplicate detection (ELSA)

768 → 12,465

AI citations at Mindful after 1,211 of ~5,000 pages were restructured

Tracking & attribution

- GA4, GTM event tracking, Mixpanel, Search Console
- AppsFlyer web-to-app and Smart Banner delivery
- BigQuery and SQL when the UI stops being enough

~10x

Inflated "SEO installs" corrected in the ELSA AppsFlyer setup

RESPONSIBILITIES & ACHIEVEMENTS

APP-FIRST · 8 SITES · 2026

ELSA Speak

70,075 pages

RESPONSIBILITIES

Indexation audit across 8 sites: 54,969 404s, 14,330 canonical errors, 3,020 schema errors; web-to-app tracking audit.

ACHIEVEMENTS

~80% of the issues fixed; Vietnam organic +30.6% (Mar → Aug 2026, Ahrefs); ~10x inflated "SEO installs" corrected.

WORDPRESS + SHOPIFY · 2024 – 2026

Mindful Organization

5% → 90%

RESPONSIBILITIES

Technical maintenance and performance audits; 1,211 pages structured for query fan-out and chunk-level retrieval.

ACHIEVEMENTS

Pages passing Core Web Vitals 5% → 90%; AI citations 768 → 12,465; +145% YoY sessions.

ENTERPRISE · PHIBIOUS · 2023 – 2025

Bridgestone Vietnam

30K → 50K

RESPONSIBILITIES

Crawlability fixed on 768 pages blocked by JavaScript rendering and network requests; 11-check audit register.

ACHIEVEMENTS

Monthly organic traffic grown from 30K to 50K in 3 months.

BEAUTY · PHIBIOUS

Threexfive (Dep365)

129K clicks

RESPONSIBILITIES

Site migration, managed with the development team.

ACHIEVEMENTS

From a zero start, 129K clicks and 4.88M impressions in the first 4 months after migration; site performance 1.5x.

NEXT.JS + HEADLESS WP · 2025 – PRESENT

LUMEtest

+37% clicks

RESPONSIBILITIES

5-round technical audit, 39 findings; content-layer fixes through the WordPress REST API, Next.js fixes ticketed to dev.

ACHIEVEMENTS

Clicks 18.7K → 25.6K / month and impressions +99% (Sep 2025 → May 2026); orphan posts 103 → 11; 538/538 meta descriptions rewritten.

HEALTH PUBLISHING · 7 PROJECTS · 2021 – 2024

Hellobacsi

11,168 pages

RESPONSIBILITIES

Technical audit of hellobacsi.com: pages over 4 clicks deep, 15,527 images without alt, 372 pages linking to 404s.

ACHIEVEMENTS

169 pages moved from 307 to 301 / 308; 106 redirect chains ticketed to Product; 512 short descriptions routed to the content team.

THE TECHNICAL AUDIT REGISTER

BRIDGESTONE VIETNAM · PHIBIOUS · 2023 – 2025

11 recurring checks · 768 pages fixed for JS rendering · 30K → 50K in 3 months

#	Tasks in details	Type	Frequency
1	XML sitemaps aren't uploaded to GSC, or there are errors listed	Issue	Monthly
2	XML sitemaps don't reflect the valid URLs on the site.	Issue	Monthly
3	Error pages do not return a 404 status code (200, redirect, etc)	Issue	Bi-weekly
4	Internal links point to URLs returning 4XX, 5XX status codes or r	Issue	Monthly
5	Multiple URLs return the same content.	Issue	Monthly
6	There are pages being canonicalised that we want in the index	Issue	Monthly
7	Target/important pages are >4 clicks from the homepage.	Issue	Monthly
8	There are orphan pages which receive traffic or are important pa	Issue	Monthly
9	Title tags are longer than 60 characters.	Issue	Bi-weekly
10	Short Page Titles	Issue	Bi-weekly
11	Title tags are duplicated across pages.	Issue	Bi-weekly

MONTHLY · CRAWL & INDEX

- Sitemaps missing or erroring in GSC; sitemaps listing invalid URLs
- Internal links to 4XX / 5XX; duplicate URLs; wrong canonicals
- Pages more than 4 clicks deep; orphan pages

BI-WEEKLY · STATUS & TITLES

- Error pages not returning a 404 status code
- Title tags over 60 characters, too short, or duplicated

WHY A REGISTER

- At enterprise scale a template error is a site-wide error within one deploy
- A fixed cadence catches regressions after each release, not months later

Issue register behind the Bridgestone technical work, each check set to a monthly or bi-weekly cadence. Captured from Andrew's project reporting.

FEATURED CASE · 01

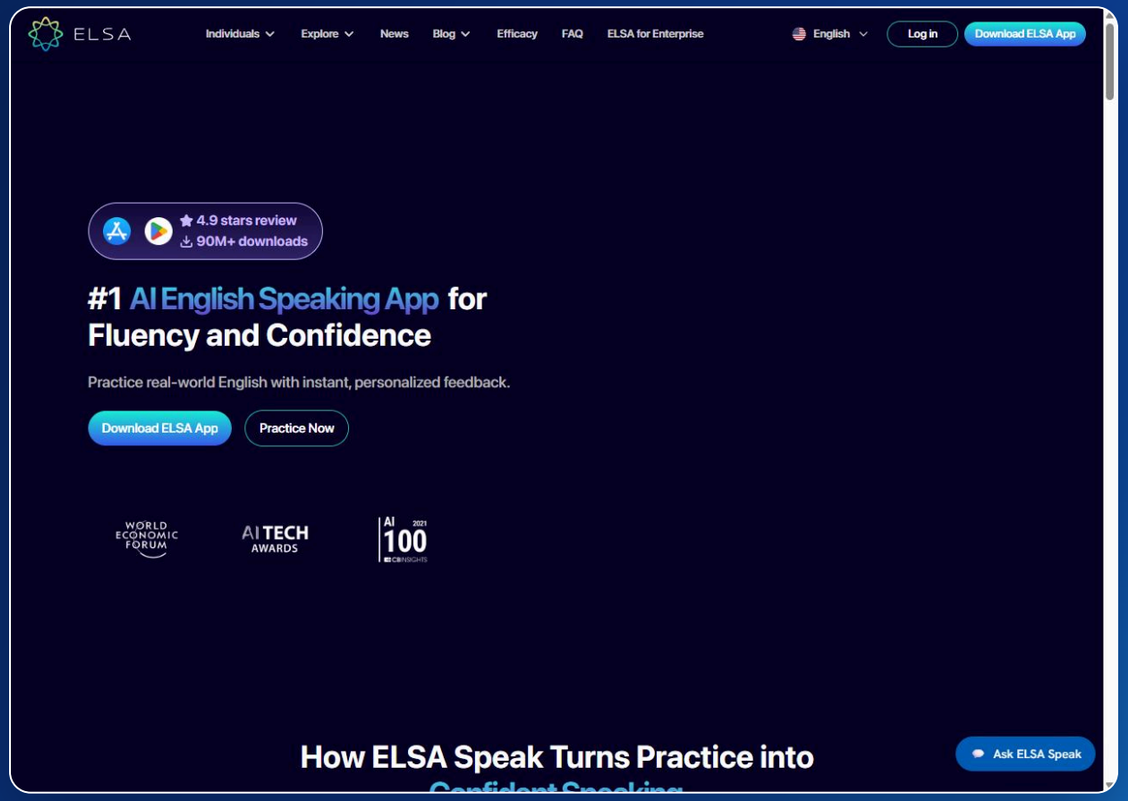

ELSA SPEAK

AI English learning app · Senior Manager, SEO & Organic Growth · Mar 2026 – Present

MARKETS OWNED

JP · VN · TH · TW · US

- Own **SEO, AEO and ASO strategy** across five markets, with month-over-month app installs as the core business KPI.
- Achieved **100% of Q3 2026 organic KPIs** — 50,000 web-to-app installs, US$175K revenue; **84%** growth in reported installs over the first 3 months vs historical data.
- Ranked **#1 in the US App Store** for the keyword "english app", up from position 2.
- Own technical SEO for **70,075 pages across 8 sites**; led the **Global and Japan website revamp roadmap** (Mar–Jul 2026) across Design, Product, Development and Brand.
- Partner with CRM to drive funnel conversion, managing **install-to-trial (I2T)** and **trial-to-subscription (T2S)** rates.

Source: elsaspeak.com — captured Sep 2026

ASO & INSTALL GROWTH

100%
Q3 2026 organic KPIs met

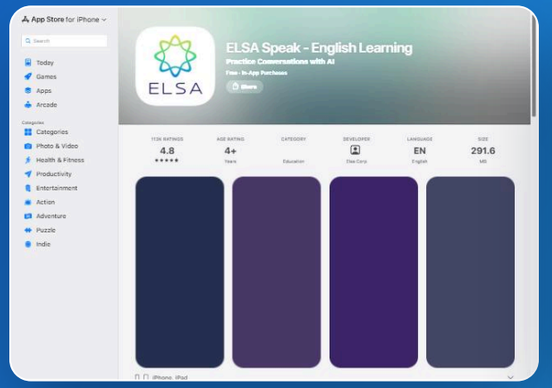

#1
US App Store — "english app"

8–10
Markets with localized metadata

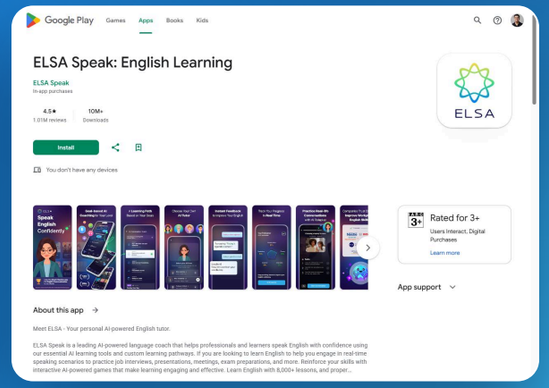

5
Markets owned end to end

What I ran

- Market-by-market **keyword research and metadata localization** — title, subtitle, keyword field and description rewritten per locale, not translated.
- **Smart Banner recovery** — fixed a domain-exclusion bug silently blocking Smart Banners on regional subdomains, re-architected to one workspace per subdomain.
- Aligned store listing with the organic landing pages so search intent and store conversion reinforce each other.
- Planned the annual ASO and **In-App Events** roadmap; tested creative through **Product Page Optimization** and tailored **Custom Product Pages** to campaign audiences.

Apple App Store · 4.8★ · 113K ratings

Google Play · 4.5★ · 10M+ downloads

AEO / GEO & ATTRIBUTION ENGINEERING

AI SEARCH DEFENCE

Holding share of voice as AI Overviews shrank

- Defended AI share of voice against a **declining Google AI Overviews presence**, tracked through Ahrefs Brand Radar.
- Identified and scaled **ChatGPT as a material new install source** across JP, VN, TH and TW.
- Built a **semantic embedding / vector database of ~20,000** Vietnamese content URLs powering semantic search, deduplication, topic clustering and RAG retrieval.

ATTRIBUTION INTEGRITY

Rebuilding web-to-app measurement

- Found and corrected an **AppsFlyer methodology issue inflating reported "SEO installs" by ~10x** — the channel was being credited for installs it did not drive.
- Fixed a **domain-exclusion bug** that silently blocked Smart Banners on regional subdomains.
- Re-architected to **one workspace per subdomain**, so each market's installs are attributable in isolation.
- Net effect: install reporting the business can plan budget against.

PORTFOLIO

13 ACCOUNTS · 11 CLIENTS

13
Ad accounts under management

11
Clients across the portfolio

3
Google Ads accounts under one MCC

10
Meta ad accounts

Scope of ownership

- Own **budget pacing, allocation and run-rate forecasting** against brief for every account in the portfolio.
- Single operator across both platforms — Google Ads MCC and ten Meta ad accounts — so cross-channel spend decisions sit in one place.
- Weekly performance and pacing review cadence per client, with variance flagged before the month closes rather than after.

Reporting layer I built

- **API data pulls** replacing manual exports across both platforms.
- **Scripted account extraction** so a new client onboards into reporting without manual setup.
- **Database-backed pacing dashboard** with period-over-period comparison.
- **Anomaly alerting** — spend and performance deviations surface the same day.

META PERFORMANCE — MAR to SEP 2026

Nine active Meta ad accounts · all figures in AUD

BEST PURCHASE ROAS

- Golden Sunrise — **8.84x** ROAS at $8.81 cost per purchase
- 3D DIY Night Lamps, vertical image — **5.06x** ROAS
- LOTR Paintings by Numbers, images — **2.55x** ROAS
- Valentines flower vase — 1.96x ROAS on 23 purchases
- LOTR "The Gates" video — 1.76x ROAS on 65 purchases, largest ad set at $1,779 spend

TESTING METHOD

- Every ad set carries the **creative owner and launch date** in its name, so winners are traceable to a person and a test cycle.
- Video, static image and UGC ran in separate ad sets on the same IP, comparing observed creative performance across ad sets.

LICENSED IP PORTFOLIO & VALUE-BASED BIDDING

LICENSED CATALOGUES RUN

- Warner
- DC
- Lord of the Rings
- Jurassic World
- Wicked
- How To Train Your Dragon

Bid strategies operated

- **ROAS goal** — Advantage+ Shopping campaigns on the highest-margin licensed catalogues
- **Highest value** — dynamic product ads against the full catalogue feed
- **Highest volume** — creative testing and scaling structures
- **Bid cap** — cost-controlled campaigns at fixed SGD caps for predictable CPA

Structure & market splits

- **Advantage+ Shopping, CBO and ABO** run side by side rather than as a single default structure
- Market splits by **US-only, worldwide and US-excluded**, so licensing territory restrictions are enforced at campaign level
- Dynamic product ads (DPA) on a worldwide ABO structure feeding the catalogue
- Creative testing campaigns feed winners into scaling campaigns rather than scaling in place

All Craft Hub figures read directly from Meta Ads Manager. Date selector shown is the account maximum range (Jun 2022 – Jul 2025); the engagement period was Jun 2024 – Dec 2025.

PROOF · 09

LORIBEDS

Global e-commerce · Technical engagement

Redundant pages, duplicate content, structural errors and security issues resolved · Core Web Vitals optimised

#	Type	Problems	Actions
1	Technical Issues	Duplicate content / URLs	Having very similar pages can cause cannibalisation issues and crawling and indexing inefficiencies. Consider improve content to make more unique if necessary, or consolidate, block, remove, or leave as they are where appropriate.
2		Broken Links	Remove broken links with live links
3		Sitemap contains invalid URLs	XML Sitemaps should only include indexable pages. Remove non-indexable URLs from the XML Sitemap or update to the correct canonical versions.
4		HTTP to HTTPS (Security)	All URLs should be to secure HTTPS pages (use 301 or 308 redirect)
5		Core Web Vitals (CWV) has not been thoroughly optimized on mobile devices	Prioritize mobile design, optimize rendering paths, and compress resources for improved Core Web Vitals scores. Ensure a responsive layout and optimize media for faster loading on mobile devices. Identify and prioritize critical resources for above-the-fold content to enhance mobile Core Web Vitals.
6	On-page	Images not optimise / missing alt text / large	Uncompressed images bloat pages with unnecessary bytes, so ensure images are optimised with compression, properly scaled, and using the best image format to reduce file size where possible. Make sure th
7		Short Page Titles	Co Us
8		Duplicate Meta Description	Up fo
9		Content isn't well-presented in search: • All current articles are in status: Thin content, poor quality, not suitable for User/Search Intent • Content doesn't have focus keyword in URL and does not match user intent.	Co pa M
10		There is no specific strategy including: • Deploying diverse content around products reduces customer conversion and helps Google better understand the website. • Not well optimized for keywords, especially semantic keywords	Co De un Ke Op Re
11	Offpage	Backlink health & Score is not optimal , missing some of important links when compare with competitors	M

Technical audit output: crawl and indexation cleanup, performance remediation and Core Web Vitals reporting. Captured from Andrew's project reporting.
